

HAFIS SABEER

QA Engineer — Manual & Automation Testing

hafis.sabeer3@gmail.com | +91 85899 37806 | linkedin.com/in/hafis-sabeer/ | Kochi, India

PROFESSIONAL SUMMARY

QA Engineer with 1.9+ years of experience across the full STLC, driving automation coverage and reducing manual regression cycle time by up to 40%. Skilled in building and maintaining UI and API test automation using Selenium, Playwright, Java, JavaScript, and REST Assured, with hands-on experience in Agile/Scrum delivery, JIRA-based defect management, Git version control, and Jenkins CI/CD integration.

SKILLS

- Test Automation: Selenium, Playwright, TestNG, Cucumber (BDD), Page Object Model
- Programming Languages: Java, JavaScript, Python
- API Testing: REST Assured, Postman, ReadyAPI
- Testing: Functional, Integration, Regression, System, Smoke, Sanity, Exploratory, Negative Testing
- Database: SQL, MySQL
- CI/CD & Build Tools: Jenkins, Git, GitHub, Maven
- Methodologies: Agile / Scrum

PROFESSIONAL EXPERIENCE

Quality Engineer (Junior SDET) | Cognizant, Kochi

Oct 2024 – Present

- Designed and executed functional, integration, regression, and exploratory test cases from business and technical requirements across web and API applications, ensuring consistent coverage across the STLC.
- Built and maintained UI automation suites using Selenium WebDriver, TestNG, and Cucumber (BDD) with Page Object Model; migrated 75+ test cases to Playwright as part of the team's automation modernization effort.
- Automated API test coverage using REST Assured, Postman, and ReadyAPI across 3+ services, cutting manual regression testing time by 35–40%.
- Executed SQL queries to validate backend data and cross-check API responses against database records during functional and regression testing.
- Partnered with Product Owners, developers, and client-side business stakeholders during UAT and story sign-off to validate application behavior and clarify requirements ahead of release.
- Participated actively in Agile/Scrum ceremonies — sprint planning, daily stand-ups, reviews, and retrospectives — within cross-functional teams.
- Owned defect lifecycle management in JIRA — logging, triaging, and tracking 150+ defects to resolution — and integrated automated test suites into Jenkins CI/CD pipelines to support consistent release validation.
- Led adoption of GenAI-assisted tools within the team to accelerate test case authoring and debugging, reducing test design time by 20%.

ACADEMIC PROJECTS

Flipkart UI Automation Framework — Test Automation Engineer (2 months)

- Built an end-to-end Selenium WebDriver automation framework from scratch using Java and Page Object Model, covering search, product listing, and cart workflows.

EDUCATION

B.Tech in Computer Science and Engineering Nov 2020 – Jun 2024

APJ Abdul Kalam Technological University — LBS College of Engineering, Kasaragod | CGPA: 7.69
